

CETCON SWR

1117

Silicone water repellent

CETCON SWR is suitable for application on almost all types of common building materials. It is suitable for porous as well as for non-porous having slight absorption properties

Advantages:

- Repellent - provides long lasting and durable impregnation to facades.
- Does not affect the breathing capacity of impregnated surfaces.
- Prevents damaging of masonry exposed to aggressive atmosphere especially by frost.
- Penetration - low absorption surfaces as well as on fine or moist surfaces.
- Transparent - base colour attraction is maintain.

Area of application:

- Cement paint walls
- Brick work
- Masonry and rendered walls
- Dhoolpur stone
- Mangalore tiles

Direction of use:

Surface Preparation:

Ensure surface are clean and free from dust. Where concrete surfaces require cleaning to remove oil or grease, use a strong detergent. The plaster should be at least 14 days old.

Application:

CETCON SWR can be applied by means of soft brushes or by spraying. Applied second coat after drying first coat.

Packing: Supplied in 1 kg, 4 kg, & 20 kg
